8

SOFFORD, 1638.

A new Almanacke and Prognostication, for the yeere of our Lord God, 1638.

Being the second from the Bissextile, or Leap-yeere.

Calculated especially for the Latitude and Meridian of the most honourable City of London: But may very well serve for most parts of great Britaine.

By *Arthur Sofford*, Philomathist.

Os homini sublime dedit, Cœlumque videre
Jussit, et erectos ad sydera tollere vultus.

LONDON,
Printed by *R. O.* for the Company of Stationers.

Vulgar Notes and Moveable Feasts, &c. 1638.

Iulian or English account.		Lilian, Gregorian or Roman account.

635	A very great Snow.	3

Astro-

Astronomicall Calculations for this present Yeare. 1638.

The true Præcession of the Equinoctiall, or the distance of the first Starre of Aries from the Equinoctiall point, according to the Prutenick Tables, is 28 deg. 26 min. 57 sec. 22 thirds. But according to Tycho Brahe and Kepler, it is 28 deg. 7 min. and 37 seconds.

The Obliquitie of the Zodiack according to the Prutenicke accompt, is 23 deg. 28 min 0 sec. 17 thirds. But according to Tycho Brahe it is 23 deg. 31 min. 30 seconds. And Kepler (making the Suns greatest Parolloxe lesse by 2. third parts then the Ancients and Tycho) would haue the Obliquitie lesse by 1 minute, viz. 23 deg. 30 min. 30 sec. very neere the same which Regiomontanus vseth in his Tables of Direction.

The Eccentricitie of the Sunne according to the Prutenick Tables is 32194, the Semidiameter of the Eccentrick being 1000000. But the Eccentricitie which Kepler vseth constantly in the Rudolphine Tables, is 3600 parts, the Semidiameter being 100000.

The Retrogradations of the Planets this yeare, 1638.

♄ Saturne is Retrograde from the 7 day of May, vntill the 24 of September.

♃ Iupi-

♃, Iupiter is Retrograde from the 10 day of February, vntill the 3 day of Iune.

♂, Mars is Retrograde from the 27 day of Aprill, vntill the 4 day of Iune.

♀, Venus is Retrograde from the 2. day of Aprill, vntill the 14 day of May.

☿, Mercurie is Retrograde from the 13 day of February, vntill the 8 day of March

2. He is Retrograde from the 11 day of Iune, to the 4 day of Iuly.

3. He is Retrograde from the 4 day of October, to the 26 day of the same.

Of the foure Quarters of the Yeare, and first of Winter.

THe Winter quarter of this yeare began according to the Prutinick Tables vpon the 12 day of December, 1637. at two a clock and 37 minutes in the morning: but according to the exact accompt of the Rudolphine Tables vpon the 11 day of December, at 10 a clocke and 26 minutes in the morning. At which time the Sunne entred into the Tropicall signe of Capricorn, making the shortest day and longest night to all that dwell on the South side of the Equinoctiall line. The length of the day being then with vs at London, 7 houres 34 min and 12 seconds: and the length of the night 16 houres 25 min and 48 seconds.

The nature of this Quarter is cold and moist, and therefore fitly resembled to the first declining Age, or Flegme, to Water, and to the West winde.

Of the Spring.

THe Spring taketh the beginning when the Sun entreth into the first scruple of the Equinoctiall signe Aries, making equall day and night throughout the whole world: Which commeth to passe this yeare according to the Prutenicks vpon the 11 day of March, at 5 of the clocke and 39 min. in the morning.

morning: but according to the Rudolphine accompt upon the 20 day of March at ten of the clocke and 31 min. in the morning.

The nature of this quarter is hot and moist. and therefore resembled well to Youth, to Blood, to the Aire, and to the South winde.

Of the Summer.

THe Summer being the third quarter Astronomicall, beginneth when the Sunne entreth into the first scruple of the Tropicall signe Cancer: which happeneth this yeare (according to the Prutenicke accompt) upon the 12 day of Iune being Tuesday, 6 minutes before one of the clocke in the morning: but according to the Rudolphine Tables, upon the 11 day of Iune at two a clocke and 10 minutes after noone. At which time the Sunne maketh the longest day and shortest night to all that are on this side of the Æquinoctiall line, the day then containing with us at London, 16 houres, 25 minutes and 48 seconds: and the night 7 houres, 24 minutes, and 12 seconds.

The nature of this quarter is hot and dry, and therefore is resembled to Infancie, to Choler, to the Fire, and to the East Winde.

Of the Autumne.

AVtumne or Harvest-quarter, begins alwayes when the Sunne entreth into the Æquinoctiall signe Libra, thereby making the dayes equall to the nights in all the world. which will be this yeare (according to the Prutenick Tables) upon the same day, at 5 a clocke, and 17 min. in the morning.

The nature of this quarter is cold and drie, and therefore most unfitly resembled to Old age, to Melancholy, to the Earth, and to the North Winde.

Verq; novum stabat cinctum florente corona,
Stabat nuda Æstas, & spicea serta gerebat:
Stabat & Autumnus calcatis sordidus uvis,
Et glacialis Hyems, canos hirsuta capillos. Ovid.

Eclipses

Eclipses.

THere will be presented to the view of the Inhabitants of the Earth this yeare five Eclipses, three of the Sun, and two of the Moone; whereof one onely and that of the Moone, will be visible in our Horizon.

The first Eclipse will be of the Sunne upon the 4 day of January, which in generall for all parts of the Earth, where it will be seene in whole or in part, is thus limited in respect of the time, as we accompt it at London, and that according to the Rudolphine Tables: viz.

The beginning of the Eclipse at one of the clocke and 39 minutes in the morning.

The middle of the Eclipse, at 4 a clocke and 50 minutes.

The end of the Eclipse at 8 of the clocke in the morning.

This Eclipse will not be seene of us, because the Sunne will be under our Horizon all the time thereof; but in the parts lying Eastwards from us, it will be seene either wholly or in part. And in the greatest darkenesse of the Sunne, there will be a small ring of the outward Verge of the Sunne round about onely remaining.

The second Eclipse will be of the Moone, upon the 16 day of June being Saturday in the morning.

The beginning thereof will be at 5 of the clocke and 24 minutes in the morning.

The middle at 7 a clocke and 27 minutes.

The end of the Eclipse at 9 a clocke and 31 minutes.

The Digits or Points darkened will be 17, and 42 min.

This will not be seene here in England, because it happeneth all in our day time; but in the parts lying Westwards from us it will be seene either in part or wholly.

The third Eclipse will be of the Sunne, upon the 6 day of July; which for the generall will be thus limited in respect of the time with us, viz.

The beginning will be at 9 of the clocke and 35 minutes in the afternoone.

The middle at 11 a clocke and 10 minutes.

The

The end at one a clocke and 10 minuts in the afternoone.

This will be but a small Eclipse and will happen in Terra Australis incognita.

The fourth Eclipse will be of the Sunne, vpon the 25 day of November being Sunday, which for the generall will be thus limited in respect of the time with vs, viz.

The beginning at 11 of the clock and 40 min. before noone.

The middle at 37 minutes past high-noone.

The end at one a clocke and 35 minutes.

This Eclipse will be a very small one and will happen in the parts lying Northward from vs, beyond the 62 of North Latitude.

The fift and last Eclipse will be of the Moone, and that a very great one to the quantity of 21 Points, happening in the night following the 10 day of December being Munday. And this onely will be seene by vs.

The beginning thereof will be at eleauen a clock and 44 minutes at night.

The middle of the Eclipse at two a clocke and 21 min.

The end of the Eclipse at 4 of the clocke and 59 min.

Briefe Rules of Husbandry.

SOw Seeds, plant, grasse, the Moone in Taurus, Virgo, Capricorne, or Aquarius, the winde not Easterly.

Sheare Sheepe in the increase of the Moone.

Fell timber for building towards and in the last quarter.

Geld or tibbe Cattell, the Moone in Aries, Sagitarius, or Capricorne.

Kill fat Swine for Bacon, about full Moone.

Cut Vines in Febzuarie or March.

Remoue trees the last quarter of the Moone, betweene Hallowmasse and the Twelfth day.
